Time: 1035-1120
Viewer: 018
Session: 01

SUMMARY OF INFORMATION:

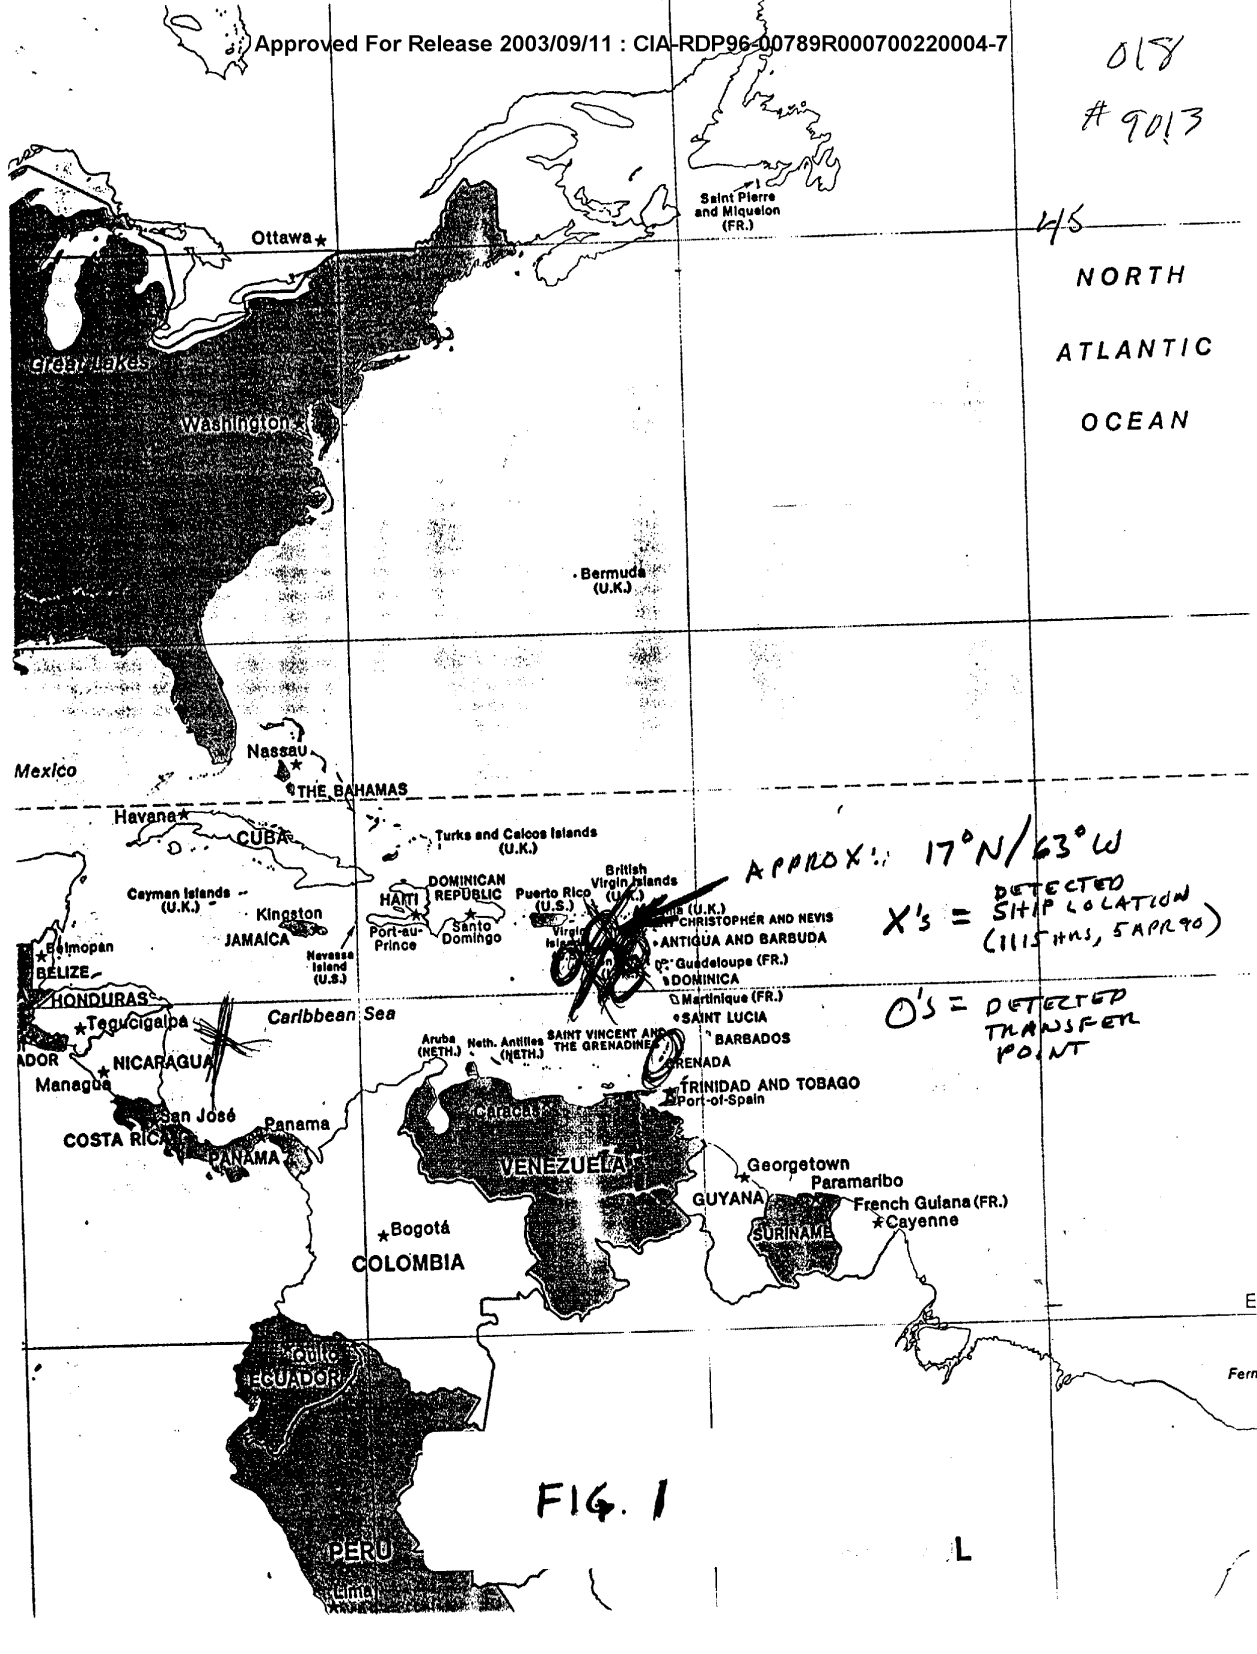

SG1A

1. (S/STD) Determine if the [] is indeed carrying contraband narcotics: Yes. It is in the form of "bricks" or blocks of white material of a hard-plastic solidity. The drugs are in clear plastic baggies located in selected large bags (+/- 50 lb. sacks) of kibble/grain/feed. The large bags are the color of unbleached paper, with very dark blue-colored labels. There was the strong impression that the drugs were not in the large bags when they were on-loaded, but were placed there by personnel on the ship.
2. (S/STD) Determine the current location of the vessel: At the time of the session (1115 hrs., 5 APR 90) the vessel was located in the general area of 17 degrees N / 63 degrees W (see Fig. 1, Map, for X-marks).
3. (S/STD) Where is the narcotics contraband located aboard the vessel?: The large feed/grain/kibble sacks are lined up along both sides of the hold. There appear to be stacks of other bags which do not have drugs located in between the two stacks which do (see Fig. 2, Diagram of ship).
4. (S/STD) Where will the off-loading/transfer of the narcotics take place?: The transfer point is almost the same as the present location. Transfer has already been made. There was a strong impression that the drugs were not OFF-loaded, but ON-loaded from a submarine.
